RINFWANG DASPAN

Software Engineer | Backend Architecture, Distributed Systems & Web3

Abuja, NG (Remote) | +234 701 427 8746 | rinfwang4@gmail.com | rinfwangdaspan-dev.vercel.app | github.com/Jim9code | LinkedIn

PROFESSIONAL SUMMARY

Results-driven Software Engineer specializing in high-throughput backend architectures, RESTful APIs, distributed systems, and full-stack web applications. Proven track record of leading backend engineering teams and building production SaaS platforms from zero to scale using Node.js, TypeScript, Express, Laravel, React, Svelte, PostgreSQL, and Solidity.

TECHNICAL SKILLS

Languages:	TypeScript, JavaScript (ES6+), PHP, Solidity, Python, SQL, HTML5, CSS3
Backend & APIs:	Node.js, Express.js, Laravel, RESTful API Design, Microservices, Webhooks, Meta Graph API, JWT / OAuth 2.0
Frontend & Web3:	React.js, Svelte, SvelteKit, Tailwind CSS, Smart Contracts, Decentralized Applications (dApps)
Databases & DevOps:	PostgreSQL, MySQL, MongoDB, Redis (Caching & Queues), Docker, Git, GitHub Actions (CI/CD), Linux, Vercel

WORK EXPERIENCE

Lead Node.js Backend Engineer — 2024 - Present

Ocean Pulse (oceanpulse.tech) — *Abuja, Nigeria*

- Lead core backend engineering and system architecture, designing fault-tolerant RESTful APIs and distributed services using Node.js, Express, and TypeScript.
- Architect normalized PostgreSQL database schemas, composite indexing strategies, and Redis caching layers that reduce API response latency across enterprise workloads.
- Engineer secure multi-tenant authentication pipelines, role-based access control (RBAC), and automated business logic workflows for B2B clients.
- Direct technical architecture decisions, enforce API design standards, lead peer code reviews, and maintain automated CI/CD deployment pipelines.

Software Engineer (Founding / Sole Engineer) — 2026 - Present

Nexflo (nexfloapp.com) — *Remote*

- Architected, engineered, and launched the entire Nexflo SaaS platform end-to-end from scratch as the sole software engineer using Svelte, Node.js, and Express.
- Built a real-time webhook ingestion and event-driven automation engine integrated with the Meta Graph API to convert Instagram comments and DMs into qualified leads.
- Designed custom keyword trigger pipelines, automated multi-step DM conversation funnels, and real-time CRM synchronization for business accounts.
- Manage production infrastructure, server health monitoring, rate-limit handling, and continuous feature delivery.

Junior Software Developer — 2024 - 2025

TheTravelHunters — *Abuja, Nigeria*

- Developed responsive frontend web interfaces in React and JavaScript while integrating asynchronous RESTful backend endpoints in Node.js.
- Designed relational and NoSQL data models across MySQL and MongoDB, implementing query optimizations and session authentication flows.
- Collaborated within cross-functional Agile sprints, contributing to sprint planning, bug triage, peer code reviews, and production releases.

SELECTED PRODUCTION PROJECTS

Nexflo (Lead Automation Platform) | *Svelte, Node.js, Express, Meta Graph API* — nexfloapp.com

- Automated Instagram comment and DM lead generation SaaS platform converting social engagements into qualified sales leads in real time.

EasyBuy (B2B Sourcing Platform) | *Laravel, PHP, MySQL, Tailwind CSS, REST API* — easybuy-web.onrender.com

- B2B wholesale procurement platform connecting corporate buyers to verified manufacturers with automated Request-for-Quote (RFQ) workflows.

Ocean Pulse (Enterprise Tech Platform) | *React, TypeScript, Node.js, PostgreSQL* — oceanpulse.tech/home

- Enterprise technology platform delivering custom software architecture and scalable backend infrastructure for global digital commerce.

EDUCATION

African University of Science and Technology (AUST) — 2024 - 2028

Bachelor of Science (B.Sc.) in Software Engineering — *Abuja, Nigeria*
